

TAI CHI LEE

HARMONY OF MIND. INNER AWARENESS. MENTAL FOCUS

What is Tai Chi?

The often-heard, oversimplified phrase to describe Tai Chi is “moving meditation.” Actually Tai Chi is a complex, internal martial art based on very simple concepts. The key word is “art” however, because art is the quality of expressing oneself according to certain principles.

Tai Chi is also a physical and mental exercise, a stress reliever, as well as a personalized, flowing dance. It’s ideal for people of any age or level of physical conditioning. By practicing simple movements based on ancient Tai Chi principles you can develop better body sense and harmony and tap into your inner core of energy for improved balance, flexibility and mindfulness.

Benefits

Continual Tai Chi practice can stimulate your internal organs and improve circulation through the increased flow of Chi - your life force or internal energy. Regular practice of Tai Chi can help you:

- Relax and relieve stress, lowering the incidence of anxiety and depression
- Improve breathing
- Lower high blood pressure
- Boost the immune system
- Improve balance and coordination
- Improve postural control while stretching, toning and relaxing the body
- Achieve a better physical and emotional balance, develop inner awareness and mental focus and increase joint flexibility

Testimonials

I have been a student of Sifu Lee's for over seven years. He has been practicing for many years under Sifu DeRosa, himself a long-time student in Master Jou Tsung Hwa's lineage. He is patient, caring, very articulate and professional.

Richard V.

Lee understands the philosophical, spiritual and martial aspects of Tai Chi and blends all three in his lessons.

He is very patient and accentuates a student's accomplishments, encourages us to work on areas that need improvement and never criticizes for not doing enough. Being a student of Lee has been a very positive experience.
